SUMMARY

- Nearly **10+ years** of IT experience which includes analysis, design, development, implementation, deployment, and maintenance of multiple applications in various domains.
- Experience in a variety of programming languages writing production quality, professional code.
- Experience in a standard Apple's design guideline like **Human Interface Guideline** to give proper iOS look and feel for better user experience towards apple product users.
- Very good team player and worked with different teams simultaneously to meet deadlines and provide a high quality of work. Also, experienced in handling the **iOS team** and making happen smooth release on live AppStore.
- Extensive experience in all phases of the Software Development Life Cycle (**SDLC**).
- Strong knowledge of **object-oriented programming** and **software design principles**
- Experienced in working in **Agile** Methodologies.
- Knowledge of native **iOS** mobile application development using programming languages like **Swift, Objective-C, SwiftUI.**
- Knowledge of pay third-party integrations like Apple Pay, RazorPay, PayPal, Paytm etc.
- Experience in building reusable UI components by using **XIB** files.
- Experience in building and publishing mobile apps in the **apple app store** and integrated Apple's **in-app** purchases. Knowledge of **Auto-Renewable** type of in-app purchase which are most useful in iOS Development.
- Following best practices of **SEO** and **Accessibility** principles as much as possible while developing UI components.
- **Integration** of third-party **APIs** like Google, Facebook, Firebase, etc.
- Good understanding of Relational **Database Management Systems** like SQLite.
- Experienced in **TDD (Test-Driven Development)** approach and sound knowledge of Unit/UI Testing.

TECH STACK

Programming Languages: Swift, Objective-C, SwiftUI
Technology: iOS, tvOS, watchOS, iMessage, Today's Extension
Database: SQLite, CoreData, Firebase
Tools: Xcode, Visual Studio Code, Postman
Design: Figma, Zeplin
VCS: Git, SourceTree, GitHub Desktop
Project/Product Management: Jira, Trello, Confluence
Architecture and Design: MVVM, MVP, MVC, XIBs

EDUCATION

**Bachelor of Engineering	Darshan Institute of Engineering & Technology**	**2010 - 2014**

- Computer Engineering (Darshan University - DU)
- CGPA 7.96

**Science Stream in 12th-HSC	Swastik School of Science**	**2009 - 2010**

- Science, Maths, Chemistry
- 69.20 %

**Technical Stream in 8th, 9th, 10th-SSC	Shree S. V. V. Virani High-School**	**2006 - 2008**

- Elements of Engineering, Workshop, Engineering Drawing
- 71.38 %

EXPERIENCE

Resiliency Program Pvt. Ltd., Delhi - IN   **December, 2022 - Present**
Team Lead iOS Developer | Remote Job
A product-based company with a health domain. To gain knowledge, improve my existing skills, and give my best efforts towards the people who feel unstable after covid situation.

Responsibilities
